WATER PURIFICATION CENTRE PLANT VISIT :

Summary of Water purification Center Plant Visit organized on **04th of March 2023** at 10.00 AM for F. Y. D. Pharm students.

During this visit students had experienced following points –

There are several water purification steps involved in the primary and secondary wastewater treatment process.

Coagulation where chemicals are added to the water supply to enable micro particles and small solids to stick together. Polyelectrolyte, ferrous sulfate, and aluminum sulfate are examples of chemicals used in the water treatment plant process to aid coagulation. Finally, water goes through a filtration process using rapid gravity filters. Sand is commonly used in this type of filter and it removes any further sediment or particles in the water. During this final stage water is passed through a filter in a regulated manner. Any particles stick to the filter, leaving clean water to be piped into the municipal supply. Pumping stations pump water to domestic customers using pipelines.

Treatment plant has scheduled maintenance visits and quality checks from municipal water treatment experts, like those at AOS, so you continue to provide an excellent service to the public visit was concluded by the vote of thanks given to all member of the Water purification Center Plant and Mrs. Hingne madam staff members of Water purification Center Plant by for allowing to conduct Water purification Plant Visit.

Speaker was **Mr. Omkar D. Paradkar**, Manager Regulatory Affairs Specialist, Labcorp, Pune

Mr. Omkar D. Paradkar discussed the following points with the students-

Sir has given important tips about communication skills, writing skills. Sir has given the important tips QA/QC is the combination of quality assurance, the process or set of processes used to measure and assure the quality of a product, and quality control, the process of ensuring products and services meet consumer expectations.

Sir has explained his experience as our career paths are especially detailed with salary changes. So, for example, if you started out with the role of quality assurance you might progress to a role such as quality assurance lead eventually. Later on in your career, you could end up with the title quality assurance manager.

One of our students has asks question that how do I start a career in quality control Determine if the QC inspector career is right for you, Obtain your high school diploma or equivalent, Consider obtaining a bachelor's or associate's degree, Consider obtaining certification in related fields, Learn company and federal product guidelines.

Three common soft skills for a quality control are interpersonal skills, leadership skills and problem-solving skills. The session was concluded by giving vote of thanks.
